

Lebanese Plastic & Reconstructive Microsurgery Excellence at its Best

Dr. Amir Ibrahim, Associate Professor, Head of the Plastic and Reconstructive Division at the American University of Beirut - AUBMC, Secretary of the Lebanese Society of Reconstructive Microsurgery - LSRM, representative of LSRM at the European Federation of Societies for Microsurgery - EFSM, and Past Treasurer of the Lebanese Society of Plastic, Reconstructive and Aesthetic Surgery - LSPRAS, won the best case prize competition at the World Society of Reconstructive Microsurgery Online Meeting, June 12, 2021. Our joy and pride of this exceptional achievement is mixed however with sadness because Amir's presentation reminded us of the Beirut catastrophic explosion of august 4, 2020.

**CONGRATULATIONS
AMIR**
